

Projects of Significance

Our experienced team ensures the integration of client's business objectives to meet the needs of the organisation's strategic outputs.

Who we work for

We have helped many defence clients in Australia realise complex transformation, some of these include:

Meet the Directors

Our skilled personnel are located across Australia, with our headquarters in Canberra, ACT. The firm has over 70 staff with four Directors:

Brett Ackroyd has over 20 years' experience as a strategic procurement and commercial / legal / organisation design adviser to government and private industry. He specialises in the design and implementation of effective supplier engagement agreements and building collaborative commercial working relationships.

Brett has demonstrated success in building and leading multidisciplinary teams delivering complex, multibillion dollar procurement projects and designing collaborative working organisations to deliver strong commercial outcomes. Brett is the Managing Director of the Institute for Collaborative Working Australia which promotes the adoption of collaborative working as a business discipline.

Anthony Allen has more than twenty-five years' experience, both as a consultant and military leader, in complex program management, research and analytics, intelligence planning and operational design for the improvement of business outcomes across Defence and Government.

This diverse career has provided him with a breadth of experience in building, managing and leading high performing teams. An active listener and decisive, Anthony weighs up options and considers all available advice before making recommendations or providing direction.

Michael Mitchell is a leader with significant experience in industry and Defence. As an experienced project manager and naval officer, he has strong analytical skills and an excellent ability to quickly interpret complex issues.

Throughout his career, Michael has been responsible for managing effective business relationships across Defence, Government and commercial stakeholders to achieve time sensitive project and operational goals.

David Swan has 30 years' experience in operations and project delivery in government and defence industry sectors. David's 23 years in the Royal Australian Navy culminated in senior roles in Engineering overseeing the establishment of a new organisation and of the contracts necessary to support the introduction of Navy assets into service.

His expertise includes strategy development and execution, the design and implementation of engineering, regulatory and asset management business models and the design and realisation of complex change programs. David excels in designing and delivering pragmatic solutions.

Elysium EPL is a trusted Australian professional services firm. We provide our clients comprehensive solutions, with enduring value.

Why choose Elysium EPL

Our expertise include design and implementation of reforms across organisational and system design, contracting/procurement and operations research and analysis. Key to Elysium's success is its decades of experience and multi-layered understanding of the Australian Defence maritime environment including current strategy, plans, programs, processes, and stakeholders.

We have a skilled, experienced team of trusted advisers that can deliver results across several practices including:

- Asset and Engineering Services
- Capability Development
- Collaborative Working
- Organisational Design and Implementation
- Protective Security and Business Resilience
- Sensitive Services
- Strategic Communication
- Strategic Procurement and Commercial Management
- Training & Education

We are experts in Australian government procurement and can provide practical guidance and support to new entrants seeking to work with the Department of Defence and the wider Australian Government, both state and Commonwealth.

Our key service offerings for UK Defence and industry in support of AUKUS include:

- **Understanding, navigating, and creating linkages with the Australian Department of Defence and its current programs and processes**
- **Operations research and analysis**
- **Providing support to develop bids/successfully respond to Australian Defence tenders**
- **Designing outcome focused organisations and collaborative contracts that deliver effective maritime capability**

To deliver these services, our specialist consultants come from a range of backgrounds across the military, law, national security and intelligence, industry, and broader government.

All our consultants have security clearances, ranging from baseline to positive vetting.

We look forward to hearing from you and assisting you with your business needs.

Clients seek us out as trusted advisers to solve their most complex problems and support them in achieving their outcomes.

Who we are

Our firm prides itself in our trusted advisers' abilities to enable long term solutions and effective outcomes. Our aim is to build our client's capability, so they continue to succeed long after we are gone.

The *Ethos* of our company ensures we are transparent and hold ourselves to the highest of standards. We create a culture of inclusion and ensure the attitudes and aspirations of our clients can be met through effective and integrated campaigns that our clients value and can effect change.

We are a team that is passionate about what we do. Our *Pathos*, ensures that we work collaboratively and value stakeholder and client consultation and feedback, keeping the project deliverables and value proposition at the forefront of all our work.

We apply logic (*Logos*) to ensure the solution meets the outcomes and will last, starting by asking, what is the desired end-state? This will ensure that the company's *Logos* connects the clear, logical connections between ideas, facts and statistics to facilitate and achieve client results.
