

# CAPABILITY DEVELOPMENT

**Building and maintaining capability is critical for enduring success.**

We help clients realise their vision for new capabilities. Our deep experience with the capability management life cycle - from inception to disposal - positions us uniquely to fulfil growing capability development and management needs across the public and private sector.

We guide clients through every phase of the capability management life cycle, empowering them for long-term success by building their capability and confidence in the process.

## ▶ The Value We Bring

Experience managing projects and programs across multiple sectors

Specialists in optimising, integrating and managing strategic Defence assets

Experts at critically analysing Defence capabilities in line with strategic objectives to identify capability gaps and opportunities

Chris Clapton, Lead

## Our Approach

We enable our clients to succeed through the provision of experienced and qualified personnel.

### Understand

We take the time to understand the client's vision, strategic objectives and the pain points that we can help them navigate to achieve the outcome.

### Empower

We integrate skilled personnel to guide clients, each bringing expertise in developing capability documents including business cases, operational concepts, capability needs statements, capability gate submissions, Project Management Plans, and more.

### Achieve

By partnering with the client, and sharing best practice approaches, we help them execute the project plan to achieve their goal. Key to this is equipping the client with the knowledge and tools they need to manage the capability and the life cycle long-term, and plan for future assets.
