

BUSINESS RESILIENCE AND PROTECTIVE SECURITY

Assuring your **business security** in an increasingly uncertain world.

More than ever before, businesses need to put security high on their agenda. Being prepared keeps your business, your people and your clients protected; it is a long-term investment in the reputation of your business.

That's where we come in - we focus on understanding your security challenges, systematically working through ways in which you can address them, and implementing enduring solutions to proactively protect against them. Our experts are familiar with all aspects of Protective Security – governance, personnel, physical, cyber, risk and technology – as well as best practice frameworks and policy settings for their application, including the Defence Security Principles Framework (DSPF).

▶ The Value We Bring

Over four decades of collective Government and Defence experience amongst our security professionals, coupled with a proven track record enhancing the security of Australian businesses.

A trusted, ethical and logical approach to uplifting your security posture, lifting the bar in governance assurance and security procedures that meet and exceed best practice framework requirements and your business outcomes.

We develop, review, and update existing security and organisational resilience plans and risk frameworks, as well as conduct education and training sessions and exercises to ensure your business is resilient.

Our Approach

Our Business Resilience and Protective Security Services specialists have the experience to ensure our clients' businesses and operations continue throughout disruptive events, meet regulatory requirements, and are secure. We adopt a client-centred approach, working closely with our clients to understand their key outcomes. By identifying existing gaps, we tailor strategies, plans, and tools to assure the security and resilience of their business. This includes security risk management, business continuity planning, incident management plans as well as education and training. Our proactive approach

leverages our team's extensive expertise and key connections across various industries, so that we can offer you comprehensive solutions to safeguard your business interests. Key to our approach is building your capability, so that you can succeed long-term.
